

# Home hub & music

A well thought out smart home built with structured cabling, allows devices all around your home to communicate, share information and work seamlessly together (i.e. share data between downstairs and upstairs or streaming music from your living room to your outdoor entertainment area). Ask yourself if you will be living in a smart home?

- ✓ Seamlessly share data between devices across your home network (LAN)
- ✓ Distribute music across your home and into different rooms\*
- ✓ Future-proof your home for new technologies

## Hills Home Hub

The Hills Home Hub has been designed to deliver broadband internet, phone, TV signals, home entertainment and audio to a central point in the home or apartment.

### Features

- Flexible equipment fixing design
- Fits approximately 8 modules
- Includes protected compartment for Hills Security System

**HES-108**
