Energy monitoring

Save money and the environment with an Owl Micro+ Electricity Monitor. An Owl monitor shows you how much electricity you are using and the amount of carbon being generated. It's wireless and battery powered to sit comfortably anywhere in the home, helping you monitor and reduce your electricity consumption.

Product protection

Ensure the highest level of surge protection for your valuable appliances around the home with a Thor power protection product. The Thor Smart Protect 4 has 4 outlets, protecting your appliances from incoming spikes and disturbances.

- ✓ Avoid the inconvenience and cost of damaged electronic products
- ✓ Large socket spacing to suit all plug packs
- ✓ Improves HIFI equipment performance
- ✓ Thor boards come with a connected product warranty, ranging from \$50,000-\$500,000
- ✓ Thor boards are available in 2 way, 4 way, 7 way and 8 way outlet configurations

Vac

Ever dreamt of vacuuming your home without need to pull around a heavy vacuum? You can now with the Hills central ducted vacuum. When building your home, a network of suction pipes which lead back to the central vacuum unit in your garage are strategically installed inside your walls.

- ✓ Powerful cyclonic suction power
- ✓ Low noise
- ✓ No need to carry heavy vacuum around home
